SLOW GLOBAL WARMING!

*Rally on April 14, 2007 from 10-2 pm
at Independence Mall*

Come join your neighbors and fellow citizens of the Delaware Valley to let Congress know that reducing global warming is absolutely critical. It is arguably the biggest challenge human civilization has ever faced.

We will rally at Independence Mall, birthplace of our nation, and in loud, joyful and determined voices let our state and federal legislators know that we must cut carbon emissions by 80% by 2050, for the survival of every living thing on our planet.

Come see a rendition of where the water line rises in Philadelphia as the ice caps melt, submerging our airport, Naval Yard and much of South Philly. There will be performances, music, and postcards to send to legislators, letting them know this is a primary concern for us.

Bring your family and friends and be part of the national movement of citizens saying to our government:

**“YOU MUST DO SOMETHING TO
STOP THE CLIMATE CHANGE
BEFORE IT’S TOO LATE”.**
